

Food

```
graph BT; FoodWinner[FoodWinner] --> Food[Food]; SpecialFood[SpecialFood] --> Food;
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'Food'. Below it, a horizontal line connects two boxes: 'FoodWinner' on the left and 'SpecialFood' on the right. A vertical arrow points upwards from the center of this horizontal line to the bottom center of the 'Food' box, indicating that both 'FoodWinner' and 'SpecialFood' inherit from 'Food'.

FoodWinner

SpecialFood
